

Living Donor Transplantation

The benefits:

- Reduce your waiting time to transplantation. (On average it takes 6 months for a living donor to go through their work up. That's far faster than waiting for a deceased donor transplant.)
- Transplant from a living donor tends to have better outcomes.
- Relatives, loved ones, and friends may be living donors.
- Blood type compatibility is not a requirement.

Ask your interested donors to fill out an Online Screening at:
